

WATER BALL VALVES

MISSOURI

795102

- F/F water ball valve with aluminium lever
- Thread EN 10226-1
- Temperature range min -10°C - max +95°C

Valve suitable for distributing and interrupting liquids that are generally non-corrosive, compatibly with the valve materials. Plumbing, heating, industrial and agricultural sectors are the ideal fields of application. It's a full bore valve and the ball seal is guaranteed by two PTFE seats.

The operating mechanism seal features two O-Rings with an internally installed stem and anti-ejection system.

It is advisable to carry out a complete maneuver cycle at least once every three months in order to prevent limescale deposits that could compromise the valve functioning.
