**HORIZONTAL VALVE
METAL SEAT**

3000

- Horizontal valve metal seat
- Thread ISO 228 - on request NPT
- Temperature range min -10°C - max +100°C / min +14°F - max +212°F

Valve suitable for distributing, regulating and interrupting liquids that could cause dezincification problems. It is especially recommended in harsh environments, such as marine ones, as long as the liquid is not salt water or with impurities that could damage the sealing.

Shipbuilding, plumbing, heating and industrial sectors are the ideal fields of application. The flow direction is indicated by an arrow on the valve body, while the installation can only be in horizontal position.

The seat tightness is guaranteed by a metal-to-metal seal.
