PRESS FITTINGS FOR PEX-AL-PEX PIPES

# **ELBOW FITTING WITH COMPRESSION END**

4008

### • Elbow press fitting with compression end for copper

- Maximum operating pressure 10 bar
- Temperature range min 0°C max +95°C
- The jaws for the fittings pressing have to be **TH** profile.

Fitting suitable for distributing fluids that are generally noncorrosive, compatibly with the fitting materials. Heating, plumbing and industrial systems are the ideal fields of application, such as high and low temperature heating systems, air-conditioning and distribution of drinking water. The tightness is guaranteed by two EPDM PEROX O-Rings, particularly recommended with water-glycol solutions, with a maximum glycol presence of 50%. The steel sleeve pressing, carried out with electromechanical tools, ensures a perfect and indivisible crimping to the pipe as well as an excellent resistance to external stress.
