

WATER BALL VALVES

TAMIGI

766300R

- M/F angle ball valve with long connector and red T handle
- Thread ISO 228
- Temperature range min -10°C - max +95°C
- Seat for thermometer 76610000 insertion

Valve suitable for distributing and interrupting liquids that are generally non-corrosive, compatibly with the valve materials. Heating, plumbing, industrial and agricultural systems are the ideal fields of application. It's a full bore valve and the ball seal is guaranteed by two PTFE seats.

The operating mechanism seal features two O-Rings with an internally installed stem and anti-ejection system.

It is advisable to carry out a complete maneuver cycle at least once every three months in order to prevent limescale deposits that could compromise the valve functioning.
