WATER BALL VALVES

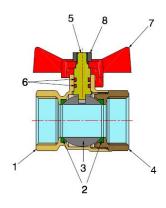

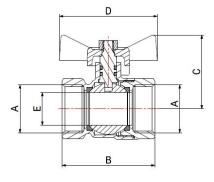

WATER BALL VALVES

DANUBIO

775000

• F/F water ball valve with T handle

- Thread ISO 228
- Temperature range min -10°C max +95°C

Valve suitable for distributing and interrupting liquids that are generally non-corrosive, compatibly with the valve materials. Plumbing, heating, industrial and agricultural sectors are the ideal fields of application. It's a standard bore valve and the ball seal is guaranteed by two PTFE seats.

The operating mechanism seal features two O-Rings with an internally installed stem and anti-ejection system.

It is advisable to carry out a complete maneuver cycle at least once every three months in order to prevent limescale deposits that could compromise the valve functioning.

COMPONENTS

PART NAME	N°	MATERIAL
Body	1	CW617N UNI-EN 12165 nickel-plated
Seal	2	PTFE
Ball	1	CW617N UNI-EN 12165 chrome-plated
End connection	1	CW617N UNI-EN 12165 nickel-plated
Stem	1	CW617N UNI-EN 12164
0-Ring	2	NBR
"T" handle	1	Lacquered aluminium
Nut	1	Galvanised iron
	Body Seal Ball End connection Stem O-Ring "T" handle	Body 1 Seal 2 Ball 1 End connection 1 Stem 1 O-Ring 2 "T" handle 1
